Introduction

What are they...

ProMedia cabinets are the result of years of engineering refinement designed specifically to address the unique needs of storing small media

Why would I use these....

ProMedia cabinets are great for smaller media and for mixed collections where you need different size drawers in the same cabinet. ProMedia Cabinets also allow the addition of the CO-7 Overfile, providing additional storage in the same footprint.

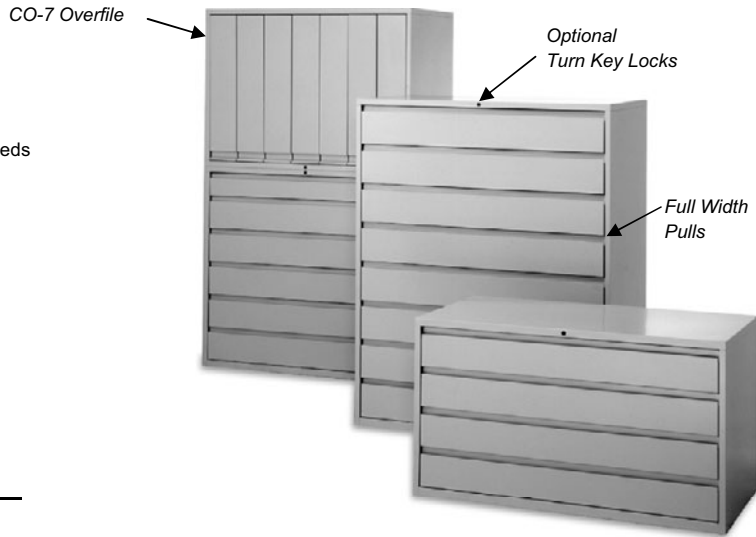

Unique Features:

Cabinets:

- **All 24" Deep** - Ergonomic reach
- **3 Cabinet Heights** - Short, Medium & Tall
- **2 Cabinet Widths** - 30" & 48"
- **Heavy Gauge Welded Construction**
- **Powder Coat Finish** - Durability with no offgassing
- **Leveling Glides** - Standard
- **Optional Turn Key Locks** - Easy security
- **Overfile** - Add on to any 48" wide cabinet

Drawers:

- **Full Width Pulls** - Clean contemporary styling
- **Mix Drawer Sizes** - Accommodates Multi-Media
- **Slide-N-Lock Divider** - Provides infinite adjustability
- **Optional Media Racks** - Great for Data Media applications
- **Heavy Duty Ball Bearing Slides** - Smooth Quiet Drawer Operation
- **Drawer Interlocks** - Standard for Safety

Part Number Logic:

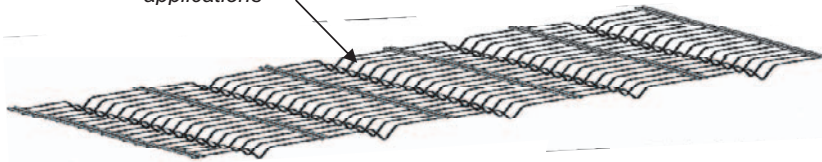

CM48 - 6 - 8

- Dividers** - Qty. per Drawer
- Drawer** - Nominal Drawer Height
- Width** - O.D. Cabinet Width
- Height** - Case Height S = Short, M = Med, T = Tall
- Product Type** - "C" = ProMedia Cabinet

The ProMedia Drawer System

Select between drop-in **Media Racks** or **Slide-N-Lock Dividers** with **Bookend** supports

Drop-in Wire Media Rack
Provides discrete slot filing for Data Media applications

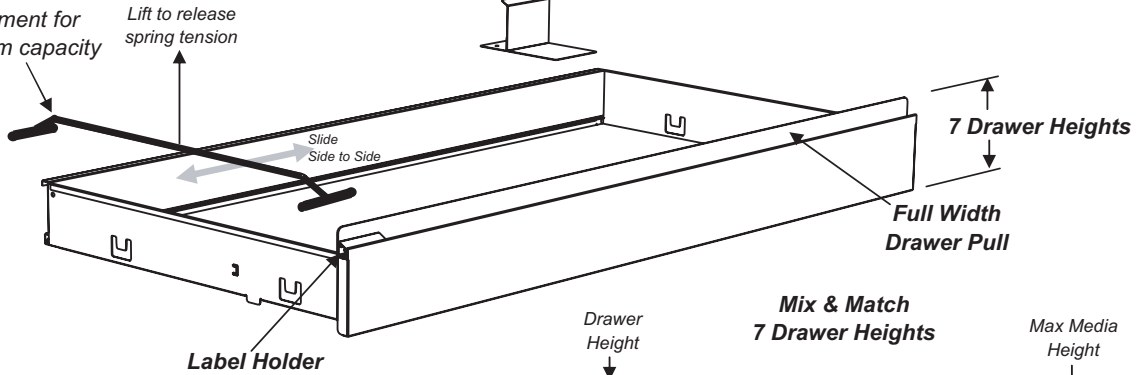

Wire Media Racks
available for:
4mm
8mm
3480 /3490
DLT in case or no case
LTO
CD or DVD in Jewelcase

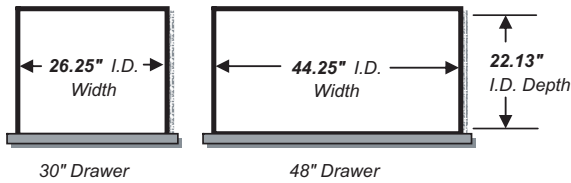

Slide-N-Lock Divider
Provides infinite adjustment for maximum capacity

Lift to release spring tension

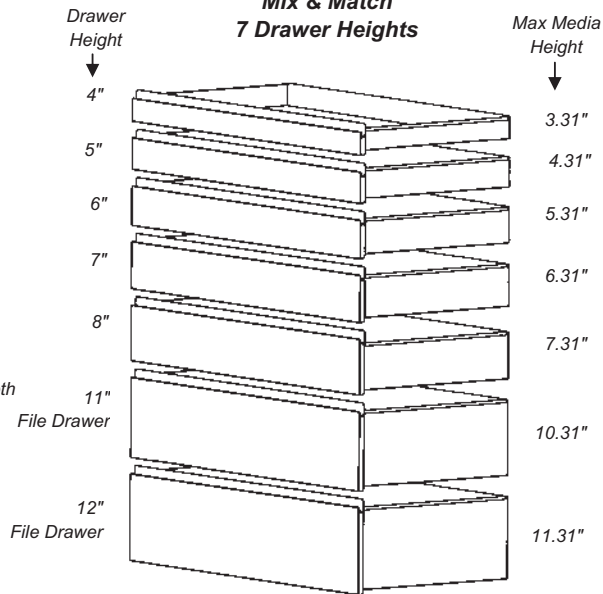

Bookend
Supports each row

Inside Drawer Dimensions

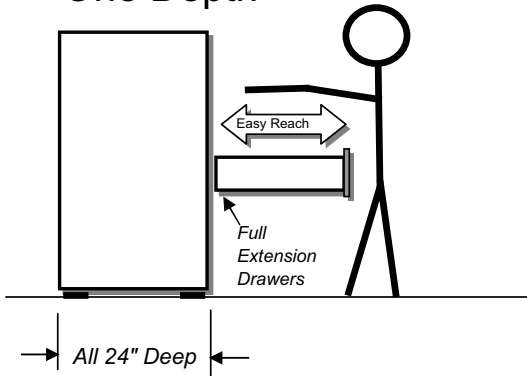

Mix & Match 7 Drawer Heights

The ProMedia Cabinet System
Easy as One, Two, Three!

One Depth

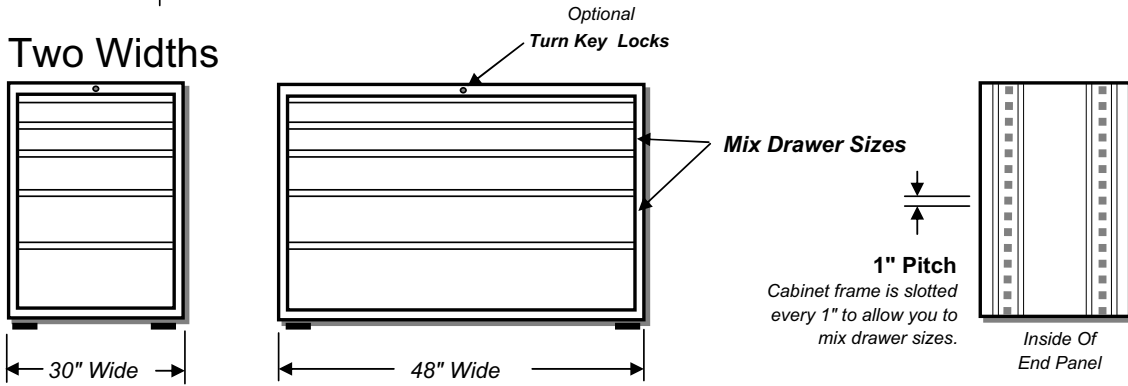

We thought about this...a lot

All ProMedia cabinets are 24" deep because this was the optimum depth, providing maximum capacity within easy reach.

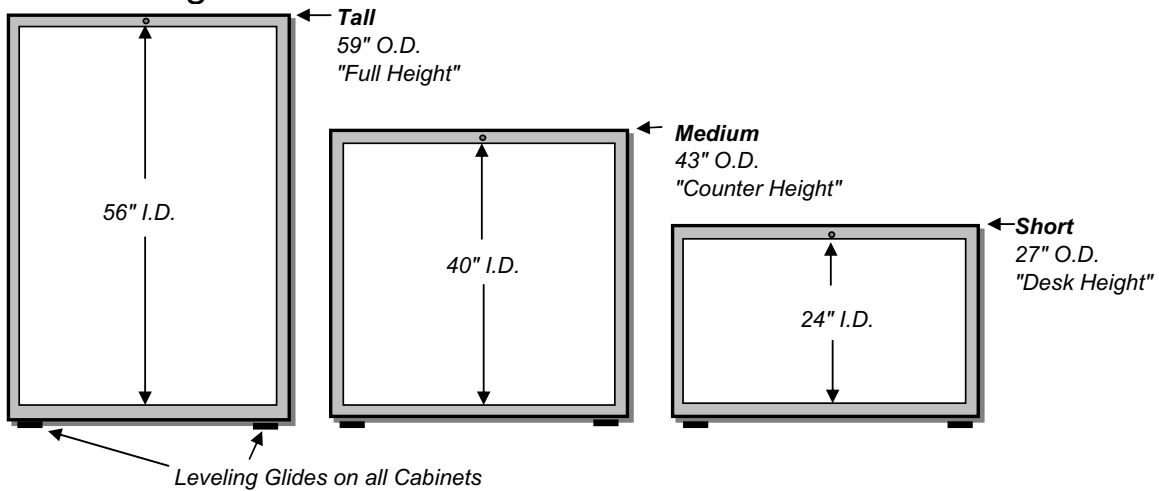

When we studied the popular media formats we found that the combination of 30" and 48" wide cabinets fit the media the best compared to say, 36" or 42".

We offer 3 heights to accommodate desk side applications, counter height applications and the maximum height that still allows the user to access the top drawer.

Two Widths

Three Heights

Tambour Door Kits

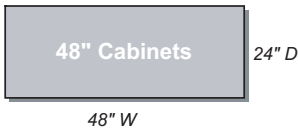

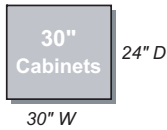

"How do I decide which cabinet to use?"

1 Consider Drawer Sizes:

Choose from 5 Drawer Heights
See previous page for details

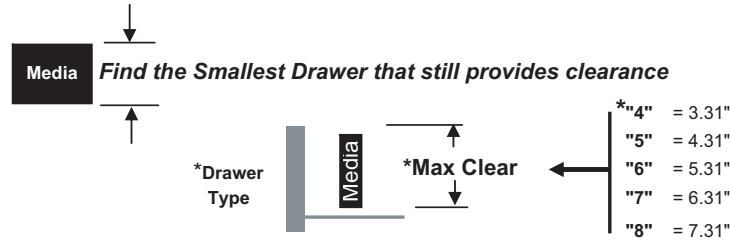

2 Consider Cabinet Footprints:

3 Consider Drawer Count:

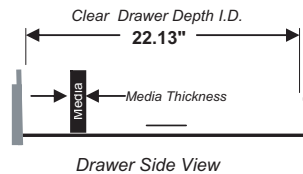

Dwr:	Short	Med	Tall
"4"	6	10	14
"5"	4	8	11
"6"	4	6	9
"7"	3	5	8
"8"	3	5	7

4 Make sure your media fits - in the selected drawer

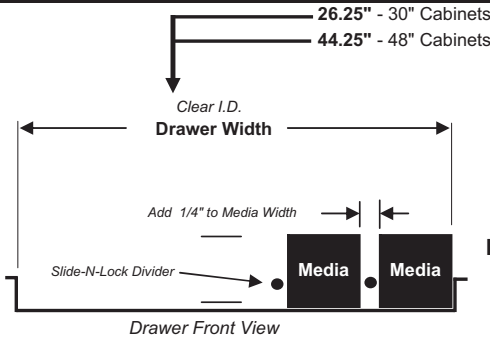

*See Next Page for Drawer Heights and Media Sizes

5 Calculate Quantity Per Row

Divide: $\frac{22.13 \text{ Drawer Depth I.D.}}{\text{Media Thickness}} = \text{QTY Per Row}$

6 Calculate Number of Rows

Divide: $\frac{\text{Drawer Width I.D.}}{\text{Media Width} + 1/4"} = \text{Number of Rows}$

6 Calculate Final Capacity

$\text{QTY Per Row} \times \text{*No. of Rows} = \text{Capacity Per Dwr} \times \text{No. of Dwr} = \text{Capacity Per Cab}$

*Number of Dividers needed per drawer is one less than the number of rows.
Order Dividers and / or Media Racks as separate line items.

Capacity Calculations:

1. Make sure your media fits - in this drawer size

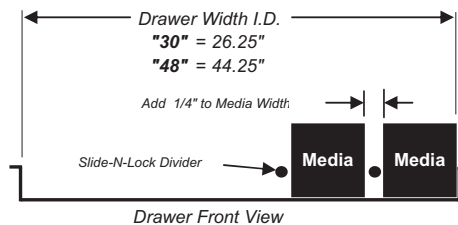

2. Calculate Quantity Per Row

Divide: $\frac{22.13'' \text{ Drawer Depth I.D.}}{\text{Media Thickness}} = \text{QTY Per Row}$

For **Data Media** applications, See All Wire Media Rack Options on page 22.

3. Calculate Number of Rows

Divide: $\frac{\text{Drawer Width I.D.}}{\text{Media Width} + 1/4''} = \text{Number of Rows}$

4. Calculate Final Capacity

$\text{QTY Per Row} \times \text{*No. of Rows} = \text{Capacity Per Dwr} \times \text{No. of Dwrs} = \text{Capacity Per Cab}$

*Number of Dividers needed per drawer is one less than the number of rows. Order Dividers and / or Media Racks as separate line items.

*UPS at Actual \$
*Flat Rate \$175 MIN

BE-CD	Hinged Bookend for CD's				3 3/4	4	2 1/4	1	UPS	\$11

Capacity Calculations:

1. Make sure your media fits - in this drawer size

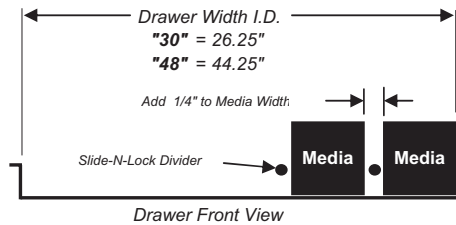

2. Calculate Quantity Per Row

Divide: $\frac{22.13'' \text{ Drawer Depth I.D.}}{\text{Media Thickness}} = \text{QTY Per Row}$

3. Calculate Number of Rows

Divide: $\frac{\text{Drawer Width I.D.}}{\text{Media Width} + 1/4''} = \text{Number of Rows}$

4. Calculate Final Capacity

$\text{QTY Per Row} \times \text{*No. of Rows} = \text{Capacity Per Dwr} \times \text{No. of Dwrs} = \text{Capacity Per Cab}$

*Number of Dividers needed per drawer is one less than the number of rows.
Order Dividers and / or Media Racks as separate line items.

*UPS at Actual \$
*Flat Rate \$175 MIN
